ISS (ZARYA)

NORAD 25544 · window 08 Nov 2026 11:15 UTC + 24 h · ground station SRM Kattankulathur

Tracking | Passes | Telemetry & health | Telemetry | Fleet | Orbital elements

Time (UTC)	Latitude	Longitude	Altitude	Speed	Sun
11:15	-14.12°	-78.93°	427.2 km	7.653 km/s	Sunlit

Over this window the altitude ranges 414–437 km, the satellite is sunlit 65 % of the time across 15 eclipses (typically 34 min), and the mean solar beta angle is 34.0°.

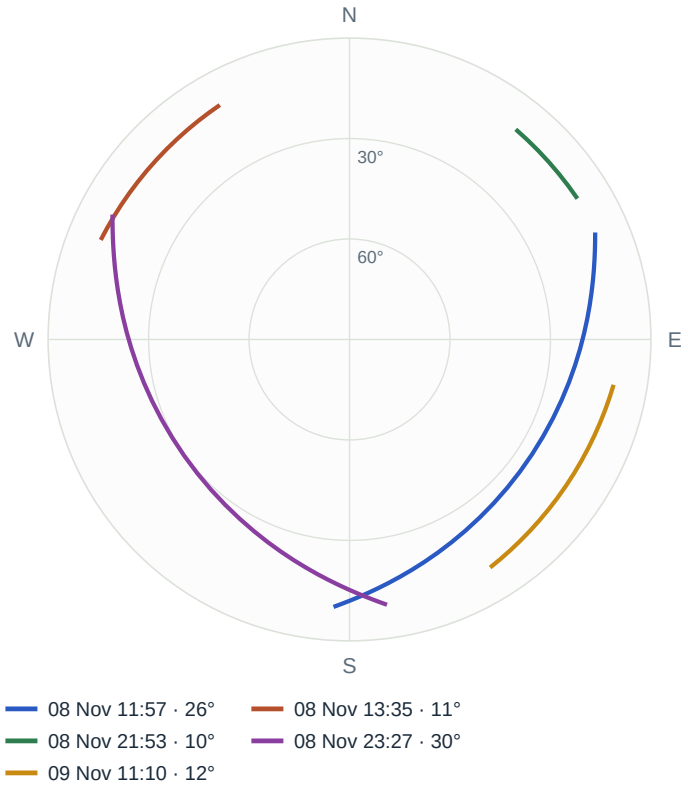

ISS (ZARYA)

NORAD 25544 · window 08 Nov 2026 11:15 UTC + 24 h · ground station SRM Kattankulathur

Passes over SRM Kattankulathur (mask 10°)

Rise (UTC)	Culmination	Set	Max elevation	Duration	Azimuth
08 Nov 11:57:09	11:59:58	12:02:47	25.6°	5.6 min	183° to 66°
08 Nov 13:35:33	13:36:39	13:37:46	11.3°	2.2 min	292° to 331°
08 Nov 21:53:11	21:53:46	21:54:21	10.3°	1.2 min	38° to 58°
08 Nov 23:27:29	23:30:29	23:33:29	29.7°	6.0 min	298° to 172°
09 Nov 11:10:59	11:12:21	11:13:42	12.0°	2.7 min	148° to 100°

Tracking | Passes | **Telemetry & health** | Telemetry | Fleet | Orbital elements

SIMULATED — not real spacecraft telemetry. Values are generated from the orbit geometry to demonstrate the monitoring pipeline; a TLE contains no spacecraft health data.

Overall health, end of window	Power health, end of window	Thermal health, end of window	Comms health, end of window
100 / 100	100 / 100	100 / 100	100 / 100
Lowest in window: 0 (alert)	Lowest in window: 25 (alert)	Lowest in window: 0 (alert)	Lowest in window: 73 (caution)

Limit events

Channel	Severity	Start (UTC)	End (UTC)	Min
Bus temperature	caution	08 Nov 21:39	08 Nov 21:40	2
Battery temperature	alert	08 Nov 21:41	08 Nov 22:16	36
Bus temperature	alert	08 Nov 21:42	08 Nov 22:16	35
No signal while in view	alert	08 Nov 23:27	08 Nov 23:34	8
Panel temperature	alert	09 Nov 07:39	09 Nov 07:39	1

Detector performance vs injected faults

Detector	Precision	Recall	False alarms	Faults caught
Limit checks only	1.000	0.138	0	3 of 5
Isolation Forest only	0.800	0.012	1	2 of 5
Forest + envelope guard	0.981	0.900	6	4 of 5
Limits + ML (used)	0.981	0.924	6	5 of 5
